

Lars Peterson will be facilitating our training today. Within the presentation platform (Zoom) we will be using Kahoot! during the session to make the training more interactive, engaging and useful. Kahoot! allows participants to type in answers to questions, which then show up on the main presentation screen (without identifiers for everything but fill in the blank and true/false).

Kahoot! instructions – 2 Options:

App: Go to the app store to install the Kahoot! app on your smart phone or tablet. It is free to download. Lars will supply a Game PIN at the start of the presentation - there is an instruction on the home screen (typically bottom middle) of your device that says: "Enter PIN". Once you submit the PIN, you may read the questions from your main presentation screen and select/type answers from your phone or tablet.

Website: Go to www.kahoot.com. If using two monitors, keep this screen open on monitor number 1. Then on your other monitor, click on your presentation link and have it open on monitor number 2. If you are using just one monitor, split your screen so you have the website www.kahoot.com on one side of your screen and the main presentation on the other side.

- Lars will provide you with a PIN number at the beginning of the presentation. Click on "Play" in the upper right-hand side of the Kahoot!.com home page and enter this PIN number.
- During the presentation, type your answers in Kahoot!.com and the answers will appear on the main presentation screen.

Please let Lars or me know if you have any questions.
